Part 1 – Choosing your Subjects

- Students have to choose six subjects, one from each group
- Three of these must be at higher level (H) and three at standard level (S)

| Group | Subject | Details |
|--------|------------------------------------|--|
| 1 | LANGUAGE A | Your first or best language. This is a literature course. The following languages are offered: H and S: English, German, Italian. S only: Albanian, Arabic, Bulgarian, Dutch, French, Japanese, Korean, Lithuanian, Mandarin, Norwegian, Persian, Polish, Portuguese, Romanian, Russian, Serbian, Spanish, Swedish, Turkish, and other languages on request. |
| 2 | LANGUAGE B | A second language. H and S: English, French, Spanish and German. Some previous knowledge is necessary. S only: Chinese for beginners and Spanish for beginners. There is also the possibility of English A2 (see Part 2, Subjects). |
| 3 | INDIVIDUALS & SOCIETIES | H or S: History, Geography, Economics. H only: Psychology, Business and Management. S only: World Politics. |
| 3 or 4 | TRANSDISCIPLINARY | S only: Environmental Systems and Societies. |
| 4 | SCIENCES | H or S: Biology, Chemistry, Physics. S only: Astronomy. |
| 5 | MATHEMATICS | H or S: Mathematics. S only: Mathematical Studies. |
| 6 | ELECTIVES | H or S: Visual Arts, Music, Theatre, or another Language or another Individuals and Societies subject or another Science. |

Some subjects run only if there is sufficient demand.

How to choose your programme:

- Choose your Highers from those subjects which you enjoy most and which support your career aspirations. These subjects are the ones that you will study in depth.
- Choose your Standards to give you a good balanced programme. You will be asked to record these subject choices on the application form.

Part 2 – Subjects

GROUP 1 – LANGUAGE A

- Language A is the study of literature in the mother tongue.
- Most of the students in the class will be native speakers of the language and will have been educated in the language.
- Only English, German and Italian are offered at both Higher and Standard levels.
- If you want to study Standard level and your language is not mentioned in the list, do not worry: we will almost certainly be able to find a teacher for you.

The Course

You will study about 15 (H) or 11 (S) works of literature in the language, 5 of which will be World Literature in translation. Written and spoken communication in the language is assessed by coursework and external examination.

Previous Knowledge

You must have native or near-native knowledge of the language. Wide background reading will give students a head start, but is not essential.

GROUP 2 – LANGUAGE B

- Language B is for foreign learners of the language.
- It is not primarily a literary course, though literature is studied as a means of understanding the complex use of the language.
- The emphasis is on communicative skills in speech and writing and on understanding the culture of the language.

The Course

Students learn the language skills of reading, writing, listening and speaking through a range of resources related to three themes: Change, Leisure and Groups. Reading and writing are tested by externally set examinations (70%), while oral skills are tested internally (30%).

Previous Knowledge

You should have at least 2 years of serious study in the language, a good knowledge of grammar and vocabulary, and be fairly fluent in ordinary conversation.

LANGUAGE B Ab Initio (beginners)

- If you want to learn a new language or do not have a second language, you should choose Spanish Ab Initio or Chinese Ab Initio.
- These are offered at Standard level only.

The Course

You will acquire a good basic knowledge of the language so that you can engage in conversation to do with everyday situations and understand and write short pieces.

Previous knowledge

Obviously you don't need any. However, any start you can make on the language (e.g. a Teach Yourself book) in the summer before you come to us would help you to get a good start.

Part 2 – Subjects

ENGLISH A2

- If you are bilingual and would be interested in doing English A2 rather than English B, please write A2 after your group 2 language choice in the application form.
- This is an IB course for bilinguals to take as their second language rather than Language B.
- It has greater emphasis on literature and near-native skills.

GROUP 3 – INDIVIDUALS AND SOCIETIES

Previous knowledge

All these courses may be taken without previous knowledge. Clearly, if they have been studied before, this will be helpful.

BUSINESS AND MANAGEMENT (H only)

You will be learning to understand why business organisations are formed, the principles, practice and basic competence employed to make them successful and their decision-making processes. Real life examples and case studies will be used. Assessment is via project (25%) and final examinations (75%).

ECONOMICS (H and S)

You will learn how to use economic reasoning and apply the tools of economic analysis to everyday problems and social issues. You will learn how individuals and societies organise themselves in the pursuit of economic objectives and will seek answers to questions such as:

- How are resources allocated between alternative uses to attain maximum levels of output?
- How do governments intervene in the economy to foster desired levels of economic stability and growth?
- How do societies around the world interact with each other, via trade or other mechanisms, to create an international economic framework?
- How do societies create new wealth?
- Why have some been more successful than others?
- Why does the spectre of poverty still haunt many nations?

GEOGRAPHY (H and S)

Geography is a bridge between the social and the natural sciences. The IB programme reflects the concern with man's relationship with the environment while retaining topics such as human geography, population, economic development and human settlements. Examples of human and physical geography are taken from all over the world. The subject is assessed through a combination of coursework and a final examination. The Standard level course deals largely with some current global problems (e.g. population, refugees, inequality, urbanisation, environmental hazards, food), and is attractive to students with an interest in current affairs and the environment. Higher Geographers study more physical geography with an emphasis on geomorphological processes. Both Higher and Standard level students will use spreadsheets, computer mapping and geographical databases.

HISTORY (H and S)

Higher level History covers major trends in Europe and the Middle East from the mid 19th century. In the 20th century, the course extends to other parts of the world to avoid a Eurocentric view. One of the major themes is the Arab-Israeli conflict, which helps the student better understand the tensions in the world today.

Part 2 – Subjects

Higher and Standard level students study three twentieth century world topics:

- The causes, practices and effects of war,
- Origins and development of authoritarian and single-party states, and
- The Cold War.

Both H and S Level students prepare a piece of Internal Assessment on a topic of their choice.

PSYCHOLOGY (H only)

You will be helped to an increased understanding of the nature of human beings, as individuals and in social groups, and you will learn to appreciate psychology as an academic discipline.

You will learn the various methods of psychological enquiry and examine the subject from biological, cognitive, learning and humanistic perspectives. Internally assessed experimental work during the programme will count (20%) towards the final marks.

WORLD POLITICS AND INTERNATIONAL RELATIONS (S only)

World Politics and International Relations familiarises students with the framework for understanding the perspectives, behaviours, and decision-making procedures of international organisations, governments, and various other national and sub-national groups.

The four modules covered are:

- The underlying principles of modern world order and power;
- The world and regional integration;
- Human rights and international law; and,
- Conflict, peace and reconstruction.

The course draws its examples from the contemporary world.

“After achieving a higher point score than predicted I decided to take a gap year and then plan to study Management at Warwick University”

Jeremy Twist
IB Points 37
Gap Year

GROUP 3 OR GROUP 4 - TRANSDISCIPLINARY

ENVIRONMENTAL SYSTEMS AND SOCIETIES (S only)

This is a transdisciplinary course which covers the requirements of Group 3 and Group 4 subjects. This broad course aims to give you an understanding of scientific method whilst at the same time heightening your awareness of the multidisciplinary (biological, geographical, political, economic, social and historical) aspects of environmental issues. The areas studied are: Ecological principles; Ecosystems; Conservation and Biodiversity; Pollution; Population and Resources.

Part 2 – Subjects

GROUP 4 – SCIENCES

All science courses on the IB share a common structure. Each is in three parts:

- A core of material that is studied at both Higher and Standard levels,
- Additional material that is taken at Higher level only,
- Options, which may be for Standard level only, Higher level only, or for both levels.

All students take part in a cross-disciplinary Science Group Project. The assessment pattern is the same for all sciences. Exams at the end of the course contribute 76% of the final mark. The remaining 24% is based on practical work set and assessed by the College.

Previous knowledge

For Higher level sciences, some previous knowledge is essential, though a general science course should be sufficient. At Standard level, previous knowledge is helpful, and students without a science background should try to do some reading before they start.

BIOLOGY (H and S)

In Biology you will study the science of living things and how they function. The Core includes Cells, Genetics, Ecology and Human Physiology. The additional material takes these further, and adds some more, such as Plant Science, and Defence Against Disease. Linking themes are Structure and Function; Universality versus Diversity; Equilibrium within Systems; and Evolution. Some Options are: Diet and Human Nutrition; Evolution; Ecology and Conservation; and Further Human Physiology.

CHEMISTRY (H and S)

In Chemistry you will study materials, and the conversion of substances one to another. Core and Additional Higher level: material covered here includes such important themes as Atomic Theory; Bonding and Structure; the Periodic Table; Acid-Base and Oxidation-Reduction Behaviour; Energetics; Equilibrium; and Organic Chemistry. Some Options are: Human Biochemistry; Environmental Chemistry; Fuels and Energy; Modern Analytical Chemistry.

PHYSICS (H and S)

In Physics you will study the properties and interactions of matter and energy. Core and Additional Higher level: these introduce the central concepts of Mechanics; Atomic and Nuclear Physics; Waves; Thermal Physics; Electricity and Magnetism. Options: Standard only: Mechanics; Atomic and Nuclear Physics; Energy. Higher and Standard: Biomedical Physics; History of Physics; Astrophysics; Relativity; Optics.

ASTRONOMY (S only)

Four distinct areas are studied in Astronomy - The Stars, The Planets, Galaxies and Cosmology.

The Stars looks at our sun in detail and then goes onto stellar evolution/ the life cycle of a star. The Planets focuses on the formation of our solar system and then planets in general. Galaxies concentrates on the constituents of our Milky Way galaxy and then galaxies in general. Cosmology is the evolution of the universe otherwise known as 'Big Bang theory'.

Part 2 – Subjects

GROUP 5 – MATHEMATICS

MATHEMATICS (H)

This is a challenging programme designed for students with a strong background and ability in mathematics. You may choose this level because you aim to study Mathematics at university, because you need it to support university study in subjects such as physics, engineering or technology, or simply because you enjoy mathematics.

MATHEMATICS (S)

This is a demanding course requiring strong background knowledge and ability. The programme contains a broad range of mathematical topics and is designed to help those students who wish to pursue further studies with a high degree of mathematical content such as chemistry, economics, geography and business.

MATHEMATICAL STUDIES (S only)

This programme is designed to develop the skills needed to cope with the mathematical demands of a technological society. Emphasis is placed on the application of mathematics to real-life situations. You should choose this course if you do not need advanced mathematics for your future studies.

GROUP 6 – ELECTIVES

In this group you can study another subject from Groups 2, 3 or 4 i.e. another second language, another Individuals and Societies subject or another science. Or, you can take:

VISUAL ARTS (H and S)

There are two parts to the course: Studio Work (practical) and Research Workbook (theory). Higher level students study both. Students choose either a course which is 60% practical and 40% theory or alternatively a course which is 60% theory and 40% practical.

You will discover, develop and enjoy different means of creative visual expression in the studio and elsewhere. You will also learn about the visual arts in all their forms, from the past, the present, and emerging trends.

Choose this subject if you have some practical skills in drawing and painting and some natural talent and interest in the subject.

MUSIC (H and S)

You will gain a worldwide and historical perspective of music as well as studying its elements. You will also create and perform music. The Standard level is a subset of the Higher level. It is helpful to have some earlier study and some musical qualification.

For Higher level it is essential to be able to play a musical instrument or to offer the voice. At Standard level ability to play and/or sing at a reasonable level is required.

THEATRE (H and S)

You will learn to understand the nature of theatre by making it as well as studying it. Making will include developing performance skills and mounting theatre productions. Studying will include historical and theoretical theatre developments and play analysis and interpretation. No previous experience is required, though it would be helpful.

Part 3 – Core Elements of the IB Programme

The IB Diploma is a complete educational programme. The subjects provide both breadth and depth, and there are three core elements which help to provide overview, additional academic specialisation, and recognition of interests outside the classroom. These are the course in the Theory of Knowledge, the Extended Essay and Activities (CAS).

Theory of Knowledge

While students choose their programmes from a range of subject areas, these are still separate subjects. With the Theory of Knowledge course, the IB adds two further qualities to a student's study. First, by looking at the pattern of all knowledge, that which is gained from subject studies and that which is gained from friends, family, the media and other sources, a sense of perspective is achieved. Students can see how new knowledge relates to the world of knowledge as a whole. Second, students are trained in the critical evaluation of knowledge, so that they can see how different types of knowledge have to be judged in different ways, and so that they can assess the value of new knowledge claims.

Extended Essay

During the two years of their Diploma studies, students are required to undertake a specific piece of research. This is usually research into an aspect of one of their subjects. For example, History students might look at a battle or a political incident that is of special interest to them. Economics students might look at the performance of a company that they know well. Biology students might study one particular ecosystem or one organism in that system.

The results of this research must then be written up in the form of a research paper of some 4000 words. This can be a challenging task, but intellectually very satisfying for a good student.

CAS

CAS stands for Creativity, Action and Service. It is realised by the IB that many students will have extensive interests outside their academic studies. In order to give recognition and encouragement to these, the IB asks them to spend one afternoon or

the equivalent time each week undertaking activities that come under one or more of these headings. For example, activities that involve Creativity include Studio Art and Photography. Action could be a team sport like football or an individual activity like swimming. For Service, students may help people in the community such as the old or the disabled, or may help charities such as Oxfam or each other (by teaching a language, for example). Some activities cover more than one heading. For example, a play performed at a local school or old people's home may well involve creativity, action and service.

PSHE

Though not an assessed part of the IB programme, St. Clare's offers students a course in Personal, Social and Health Education covering a wide range of topics such as relationships, study skills, citizenship, substance abuse and healthy eating.

The PSHE curriculum includes a programme to develop career management skills and preparation for higher education. The college provides a dedicated careers and higher education adviser to co-ordinate this programme and to provide individual guidance.

“I still feel thankful that I chose the IB instead of A levels”

Qiong Hao Wang
IB Points 35
King's College London,
Business Management

Part 4 – Grading System: IB and St. Clare’s

The system used for internal purposes during the course is that employed by the International Baccalaureate Organisation in the award of the Diploma. Each of the six subjects studied is graded on a 1-7 scale as follows:

| Grade | Description |
|-------|--------------|
| 7 | Excellent |
| 6 | Very good |
| 5 | Good |
| 4 | Satisfactory |
| 3 | Mediocre |
| 2 | Poor |
| 1 | Very poor |

Award of the Diploma

The IB Diploma will be awarded to candidates who in the examinations obtain a total points score of 24 points or more.

This total must be achieved in conformity with the following provisions:

- a. Higher level subjects: in principle the candidate should achieve a Grade 4 or above in each Higher level subject. Nevertheless, ONE Grade 3 (but not a Grade 2, nor a Grade 1) will be acceptable if compensated by Grade 5 or above in another subject offered at Higher level.
- b. Standard level subjects: results of subjects offered at this level must not include:
 1. A Grade 1
 2. More than ONE Grade 2.
- c. Overall results: this must not include:
 1. More than three Grade 3s
 2. More than one Grade 3 if there is a Grade 2 at Standard level.

Theory of Knowledge and Extended Essay

Each is graded on one of 5 bands:

| | |
|--------|---------------------------------|
| Band A | Work of an excellent standard |
| Band B | Work of a good standard |
| Band C | Work of a satisfactory standard |
| Band D | Work of a mediocre standard |
| Band E | Work of a poor standard |

In Theory of Knowledge, written work completed during the course is graded externally. Presentations in class are assessed at St. Clare’s. Extended Essays are graded externally.

“The IB took a lot of organisation and hard work but above everything else it was brilliant fun”

Jade Bestley
IB Points 43
Durham University, History

Part 4 – Grading System: IB and St. Clare’s

Arriving at a Total Points Score

The total number of bonus points awarded is determined according to the following matrix.

| | | Theory of Knowledge | | | | |
|----------------|---|---------------------|----|----|----|----|
| | | A | B | C | D | E |
| Extended Essay | A | +3 | +3 | +2 | +2 | +1 |
| | B | +3 | +2 | +1 | +1 | |
| | C | +2 | +1 | +1 | 0 | |
| | D | +2 | +1 | 0 | 0 | |
| | E | +1 | | | | |

For example, a candidate who achieves level B for Theory of Knowledge and level C for the Extended Essay will be awarded one bonus point. Candidates who achieve level E for both Theory of Knowledge and the Extended Essay fail automatically. Candidates who achieve level E for either the Theory of Knowledge or the Extended Essay will be awarded F for their bonus score. The award F is a failing condition for the Diploma unless 28 points or more are scored overall.

The combination of points for subjects and bonus points means that the maximum possible points score for the Diploma is 45.

Internally Awarded Grades

During the course, work is graded on the IB system and the grades form part of the student’s internal record. These internally awarded grades appear on the transcripts issued at regular intervals throughout the course. These internal grades form the basis of the predicted grades for university applications and for the International Baccalaureate Organisation.

Internal grades are awarded as follows:

- Exam Grades – in the first year awarded on the basis of performances in formal exams held in November and June as well as in-class assessments. In the second year awarded on the basis of formal exams in February as well as in-class assessments.

- Course Grades – awarded at the end of each term on course work done during the term. They represent an average grade for oral and written work actually produced by the student.

Transcripts

These give a record of grades achieved during the course, along with activities taken. They are produced at the end of each term, and sent to parents with the reports. They are suitable for sending to universities e.g. in the United States.

“Coming to St. Clare’s was everything they said it would be and more; hard work definitely but also very satisfying and a lot of fun!”

Beth Kasperczak-Wright
IB Points 45
Oxford University, English

Part 5 – Results: The Pattern of Recent IB Results

St. Clare's is pleased to announce another very pleasing set of results in the May 2009 exams which reflects the outstanding work of students and staff together.

We achieved:

- An outstanding overall pass rate of over 98% and an average points score of 34.35 – this kept us well ahead of the world average points score of 29.53.
- 49 students with 35 points or more (considered equivalent to 4.5 grade As at A level).
- 2 students with 45 points - the highest possible mark, achieved by only 0.2% of candidates around the world.
- 17% of students gaining the elite category of 40+points (top 5% in the world).

This is the fifth consecutive year in which we have had 45 point students, an outstanding achievement in the fiercely competitive IB environment.

Comparison of St. Clare's 2009 results with previous years

| | 2005 | 2006 | 2007 | 2008 | 2009 |
|---------------------------------|-------|-------|-------|--------|-------|
| Students with 40 points or more | 18.8% | 13.1% | 10.8% | 10.0% | 16.7% |
| Students with 30 points or more | 83.2% | 73.7% | 68.7% | 72.73% | 83.3% |
| Students with 24 points or more | 98.0% | 96.1% | 94.0% | 97.27% | 99.0% |
| Mean score (excluding retakes) | 34.54 | 33.49 | 32.49 | 32.85 | 34.35 |

The maximum score is 45 points and the pass mark is 24 points.

St. Clare's IB Diploma average points scores have consistently outperformed world averages:

St. Clare's IB Diploma pass rates have consistently outperformed world pass rates:

Part 5 – Results: The Pattern of Recent IB Results

IB Highlights from the past 3 years

- In 2007 the average points score was 32.49 for St. Clare's students. This compared with 29.6 worldwide.
- In 2008 over 96% of St. Clare's students achieved the IB Diploma. This compared to just 78% worldwide.
- In 2009 over 98% of our students achieved the IB Diploma with an average points score of 34.35, compared to figures of 79% and 29.53 points worldwide.

In 2007 most of our academic subjects outperformed the world average by a significant margin. The following is just a sample:

- ◆ in Spanish A1 Standard Level the average was 6.00, compared to 4.86
- ◆ in English A2 Higher Level the average was 6.00, compared to 5.30
- ◆ in French B Standard Level the average was 6.25, compared to 4.86
- ◆ in Economics Higher Level the average was 5.54, compared to 5.05
- ◆ in Physics Higher Level the average was 5.64, compared to 4.47

In 2008 our results were equally impressive when compared to world averages:

- ◆ in Biology Higher Level the average was 5.44, compared to 4.14
- ◆ in Chemistry Higher Level the average was 5.24, compared to 4.59
- ◆ in Physics Higher Level the average was 5.77, compared to 4.49
- ◆ in Mathematics Higher Level the average was 5, compared to 4.52
- ◆ In English A1 Higher Level the average was 5.36, compared to 4.49

“The IB was a challenging but rewarding programme of study and I would recommend it to anyone”

Libby Knowles
IB Points 27
Swansea University, Law

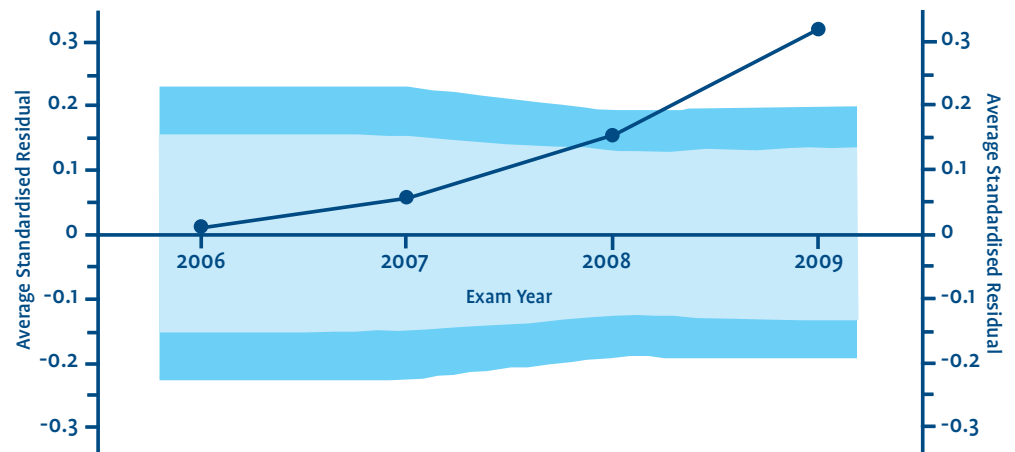

This year (2009) we achieved our best ever results when compared with world averages; here are some examples:

- ◆ in Mathematics Standard Level the average was 5.31, compared to 4.45
- ◆ in English A1 Higher Level the average was 5.87 compared to 4.70
- ◆ in English B Standard Level the average was 6.50 compared to 5.72
- ◆ in French B Standard Level the average was 6.11 compared to 4.72
- ◆ in Economics Higher Level the average was 5.86 compared to 5.09
- ◆ in Chemistry Higher Level the average was 5.87 compared to 4.40

How much value do we add for our students?

The graph below is based on an ALIS analysis (Advanced Level Information System) carried out by Durham University. It compares the progress made by students during their two years at St. Clare's to the progress made by students in other schools and colleges. The results show the excellent progress that students make at St. Clare's between the time of their arrival and sitting the IB exams. It also shows that this indicator of success has improved for each of the past 4 years.

Part 6 - University Destinations

UNIVERSITY DESTINATIONS 2009 – SUMMARY INFORMATION

The vast majority of St. Clare's graduates go to university as the next step in their career. Our students are welcomed by institutions all over the world, and during their two years at St. Clare's they are well prepared for and guided through decisions and applications.

Most students start university immediately while a small proportion choose to develop their personal skills and interests by taking a 'gap year' in which to travel, work or volunteer and thus improve their career prospects prior to continuing in education. A few undertake national service before progressing to university.

Those progressing to higher education in 2009 applied far and wide and have been successful in taking places at prestigious universities around the world. This has been a year of excellent results which has ensured success for our students, particularly at a time when competition is strong.

The list of destinations in 2009 is summarised below:

| Destination | Number of students |
|---|--------------------|
| UK universities (see below for details of top universities) | 62 |
| US universities: Bryn Mawr, Johns Hopkins, Pennsylvania, Pitzer, Reed | 7 |
| European universities including Bocconi (Italy), Hamburg (Germany), Rotterdam (Netherlands), EHL and Les Roches (Switzerland) | 7 |
| Asian universities: Hong Kong and Kazakhstan | 3 |
| Australasian university | 1 |
| Art foundation colleges | 2 |
| Gap year (most already placed in universities) | 15 |
| Employment or national service | 4 |
| Undecided | 2 |

Worldwide Destinations IB 2009

US and UK university league tables

For 2009, 35 St. Clare's graduates have been placed in the top 20 UK and US universities (as ranked by The Times newspaper and US News and World Report: America's Best Colleges), with 18 in the top 10 (see detail below). These universities are ranked nationally using figures to represent an average of each university's teaching, research, entry standards, staff-student ratio, degrees awarded, job prospects and spending per student.

Students placed in the top 10 US and UK universities are as follows:

| | No. of students |
|---------------------------|-----------------|
| US Penn | 2 |
| UK Oxford University | 2 |
| Cambridge University | 1 |
| Imperial College London | 2 |
| University College London | 3 |
| Warwick | 3 |
| LSE | 1 |
| Durham | 1 |
| Exeter | 2 |
| Bristol | 1 |
| Total | 18 |

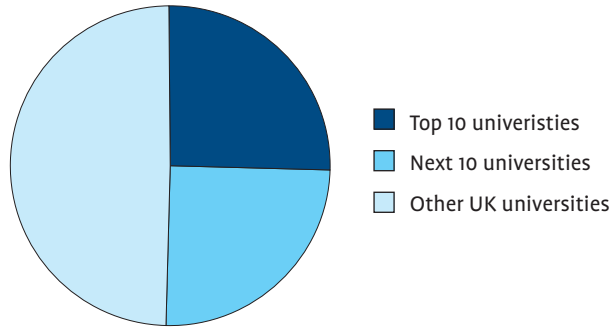

"I want to say a huge thank you to all the teachers who help every student immensely throughout the IB"

Indira Gareva
 IB Points 38
 Bristol University, Medicine

Part 6 - University Destinations

IB students attending top 20 UK universities

The choice of degree subjects includes medicine, law, engineering, history/politics, economics, business studies, modern languages, architecture, public relations, psychology, international relations, geology, Middle Eastern studies and liberal arts.

IB students attending top 20 US universities

Liz Reece
Careers & Higher Education Adviser

Paul Sinclair
US Universities Adviser

Part 7 – Scholarships and Bursaries: IB Diploma

Scholarships

Scholarships are awarded to exceptional students who could not otherwise attend the College. They are offered on the basis of financial circumstances (all awards are means tested), school record, confidential references and performances in an examination and interview held in Oxford.

No more than two full awards (covering tuition and accommodation fees) are made. Most are partial awards, covering a proportion of total fees. Attendance in Oxford for interview and examination is required to be considered for a scholarship.

Scholarship applications are considered in early February of the year of proposed entry. The deadline for applying for a Scholarship for entry in September 2010 is

Friday 5 February 2010 and Scholarship Day is on Saturday 27 February 2010. Please contact the Admissions Office for further details and an Application Booklet.

Email: admissions@stclares.ac.uk for more information.

Bursaries

Bursaries are partial fee awards made on the basis of financial circumstances and likely contributions to and benefit from the IB Course at St. Clare's. Some are awarded to applicants who attend the Scholarship Day. Others are made after the award of scholarships, from March onwards before the August of proposed entry, subject to availability of funds. Bursaries usually do not exceed 50% of fees. Please contact the Admissions Office for further details.
